- Manufactured in Europe
- Forged Steel Body
- 2-year Warranty
- ISO Certified
- DIN Standard
- Guaranteed to provide exceptional accuracy and clamping over an extended period
- Designed for Heavy-Duty Work

### Available Options

- **3-Jaw Self-Centering and 4-Jaw independent configurations both with 2-PC Jaws**
- **Direct mounting for A2 Spindle Nose**
- **Large Thru-Hole Options**
- **Diameters ranging from 20" to 40" in stock, with production capacity above 40" available upon request**
- **Chucks with Flat Recessed Mounting available on request**

## Designed for Heavy-Duty Work

TMX Oil Country chucks are perfectly crafted for rugged applications and conditions throughout the oil and gas industry.

## American Standard Heavy-Duty Tongue and Groove Jaws

Both master and top jaws feature matched fine serrations to increase total gripping area, maximizing gripping force, preventing slippage on the workpiece.

## Exceptional Precision

The high gripping force, chuck body rigidity, and oversized jaws contribute to high precision and repeatability, delivering superior results even at high RPMs.
