

Code	Grade	Coating Process	Coating Type	Main Application	Cutting Material	Color	Grade Description
10	PH0910	Uncoated	Uncoated	Multiple	Aluminum	Grey	carbide grade suitable for turning and milling of aluminum alloys combined with high positive geometries.

Milling

PH0910

(K01-K10)
(N01-N20)

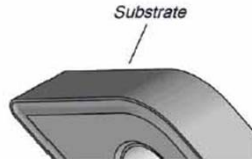

Uncoated carbide micro-grain grade combining a good abrasive wear resistance and toughness. Suitable for rough to finish operations of HRSA, Titanium alloys, cast irons and Aluminium alloys.

Turning

PH0910

(N01-N20)

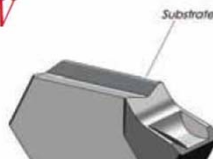

Uncoated carbide micrograin grade combining a good abrasive wear resistance and toughness. Suitable for rough to finish turning of Aluminium alloys.

Parting and Grooving

PH0910

NEW

(N01-N30)

Uncoated carbide micrograin grade combining a good abrasive wear resistance and toughness. Suitable for Non-Ferrous Materials and Aluminium alloys.
