

Code	Grade	Coating Process	Coating Type	Main Application	Cutting Material	Color	Grade Description
78	PH6125	PVD	TiAlN	Milling Drilling	Steel	Grey	coated carbide grade for light to heavy milling in steel at elevated speeds. Excellent choice for mold steels.

Milling

PH6125

(P20-P30)

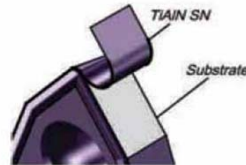

PVD coated carbide grade for light to heavy milling (wet and dry) in steel at elevated temperature (e.g. in hardened steels or pre-hardened steels). Excellent grade to milling of mould steels at high productivity.

Drilling

PH6125

(P20-P30)

PVD coated carbide grade for light to heavy drilling in steel at elevated temperature. Excellent grade for drilling of steels at high productivity.
